

## **Borealis Broadcasting grows to 5 northern radio stations**

Oct 10, 2018 – [CRTC](#) Approves Borealis Broadcasting network of community repeaters.

<b>CFET</b>	Tagish and Marsh Lake	Yukon	106.7 FM
<b>CJHJ</b>	Haines Junction	Yukon	99.9 FM
<b>CJCC</b>	Carcross	Yukon	99.9 FM
<b>CHTR</b>	Atlin	British Columbia	99.9 FM
<b>CHUG</b>	Inuvik	Northwest Territory	99.9 FM

*Also available in many popular streaming media formats*

These stations run as a centrally managed network using the [OpenBroadcaster](#) system, allowing local communities and talent to manage programming and schedules using a common web browser. Harnessing the power of AI (Artificial intelligence) and predictive discovery algorithms makes all of this possible. We get machines to do the heavy work and decision making, freeing up precious time for talented people to focus on radio, and sharing stories from our part of the world in Northern Canada.

## **Reflective Community Programming**

Exclusive community based programming and special events coverage in third party languages and indigenous regional dialects provides an outlet to highlight and promote our region's excellent and talented local music scenes. Democratic radio run by consensus.

## **Public Alerting Champion**

We are especially proud to be able to provide unattended regional emergency alerting services in English and French with support for Indigenous language alerts. Remote Atlin, BC doesn't have cell phone services or any over the air emergency alerting, making this a vital service in times of crisis.

## **About Borealis Broadcasting**

Borealis Broadcasting, re-branded from CFET Radio, is a sole proprietorship owned by Robert G. Hopkins from Tagish, Yukon. CFET had its first broadcast Labour Day Weekend 1997, eventually receiving the first commercial FM radio licence issued by the CRTC in the Yukon Territory.
